RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Original publisher: Washington, DC: Western Energy and Land Use Team, Division of Biological Services, Research and Development, Fish and Wildlife Service, U. S. Dept. of the Interior, 1984 OCLC Number: (OCOlc)297374022 Subject: Habitat partitioning (Ecology) -- Mathematical models. Excerpt: . . . in home range use in response to vegetation changes and weather are common. Anderson and Pelton (1976) reported that eastern cottontails that did shift their home ranges were not observed to return to their original home range. Temporary home range departures were recorded after the onset of the breeding season. Unless a sudden reduction of cover occurred, cottontail s remained within their home range. Harvesting of crops did result in evacuation of home ranges. Swi hart and Yahner (1982b) a so recorded abandonment of home ranges 1 as a result of crop harvest. Emigration from home ranges within croplands resulted in autumn and winter concentrations of eastern cottontails within nearby wooded habitats. Local populations of eastern cottontails may reach a density of 20 (8 acre) rabbitslha although densities are normally lower (Chapman et al. 1982). The...

Reviews

This written publication is wonderful. It really is loaded with knowledge and wisdom You will not really feel monotony at at any time of your time (that's what catalogues are for relating to if you ask me).

-- **Desmond Becker**

Absolutely essential go through publication. I am quite late in start reading this one, but better then never. You will not feel monotony at at any time of the time (that's what catalogues are for regarding if you ask me).

-- **Ambrose Thompson II**
