This landmark book, first published in 1987, is now back in print, with a new introduction by its award-winning author. An interdisciplinary approach to the central themes of scientific and religious thought, this book was widely heralded upon its publication for the richness and depth of its contribution to the science and religion dialogue. Notable for its breadth and depth . . . filled with admirably argued and powerfully presented treatments of critical issues. Joseph Pickle, Colorado College, *Zygon: Journal of Religion and Science* a superb and subtle book. David Foxgrover, *Christian Century* a monumental work . . . [T]he book is truly outstanding. John H. Wright, Jesuit School of Theology, Berkeley, *Theological Studies* Rolston's presentation of the methods of science, along with up-to-date summaries of the main achievements of the various sciences, is commendable for its clarity and critical acumen. Choice According to Holmes Rolston III, there are fundamental questions that science alone cannot answer; these questions are the central religious questions. He uses the scientific method of inquiry to distill key issues from science, and then he integrates them in a study that begins with matter and moves through life, mind, culture, history, and spirit. Incorporating religious and scientific worldviews, he begins with an examination of two natural sciences: physics and biology. He then extrapolates examples from two human sciences: psychology and sociology. Next, he moves to the storied universe and world history, raising and addressing religious questions. Never in the histories of science and religion have the opportunities been greater for fertile interaction between these fields, with mutual benefits to both, states Rolston. The re-publication of this book provides current researchers and students in the field an invaluable, timeless methodological resource. The new introduction offers updated insights based on new scientific research.
