

United Nations Framework Classification for Fossil Energy and Mineral Reserves and Resources 2009 Incorporating Specifications for its Application

By United Nations: Economic Commission for Europe

United Nations. Paperback. Book Condition: new. BRAND NEW, United Nations Framework Classification for Fossil Energy and Mineral Reserves and Resources 2009 Incorporating Specifications for its Application, United Nations: Economic Commission for Europe, This publication contains the text of the United Nations Framework Classification for Fossil Energy and Mineral Reserves and Resources 2009 (UNFC-2009) and the Specifications (basic rules) for its Application. UNFC-2009 is a universally acceptable and internationally applicable scheme for the classification and reporting of fossil energy and mineral reserves and resources and is currently the only classification in the world to do so. As with extractive activities, UNFC-2009 reflects conditions in the economic and social domain, including markets and government framework conditions, technological and industrial maturity and the ever present uncertainties. It provides a single framework on which to build international energy and mineral studies, analyze government resource management policies, plan industrial processes and allocate capital efficiently. The Specifications make UNFC-2009 operational. They set out the basic rules that are considered necessary to ensure an appropriate level of consistency in application. They provide additional instructions on how UNFC-2009 should be applied in specific circumstances. By covering all extractive activities, UNFC-2009 captures the common principles
