Monthly Notices of the Royal Astronomical Society Volume 24 (Paperback)

By Royal Astronomical Society

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1864 Excerpt: .as well as No. 3, escaped the scrutiny of Sir John Herschel at the Cape with the 20-foot reflector. 5. n Orionis. This is a very interesting object, and undoubtedly binary. It was scrutinised by Sir W. Herschel, who noted a faint distant star, and, consequently, placed it in his sixth class of double stars. But, as he perceived no elongation, and Struve also regarded it as single in 1826, it must have come out since, and the distance has certainly increased during the last ten years, while the angle has remained very nearly stationary. 6. Bessel (Weisse) v. 520. An elegant little object. The magnitudes were obtained by gauging with apertures; as is also the case in the other instances where the magnitudes are noted to tenths of a unit. 7. The small star north-preceding Procyon is too distant to constitute it properly a double...

Reviews

This book is definitely worth acquiring. I have go through and so i am certain that i will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after i finished reading this publication in which actually altered me, change the way in my opinion.

-- **Andres Bashirian**

Comprehensive guide for publication fanatics. This really is for all who statte there had not been a well worth reading through. I discovered this ebook from my dad and i encouraged this book to find out.
