paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 220 Publisher: Electronics Industry Pub. Date :2007-09-01 first edition this book non-power class professional Circuit Analysis. low-frequency electronic circuits. Digital Electronics. electrical and electronic learning and electronic professional circuit basis. low-frequency electronic circuits. Pulse and digital circuits. and other programs of experimental and practical guidance materials. The textbook for engineering students master the necessary basic theoretical knowledge and practical skills were introduced and the corresponding experimental training is presented in: test content. test requirements for vocational students; experiments including basic skills training. comprehensive skills training and basic test . validation experiments and practical circuit. integrated circuit design. focusing on practical application of skills and innovation ability. This book is more comprehensive. specialized for different types of engineering characteristics of flexible use. Contents: Chapter basics of electrical and electronic training the basics of Section II electronic measuring experimental procedures and experimental troubleshooting section III experimental preparation of the report requirements of Chapter II of electronic components and the basics of Section II resistance Section IV transformer coil inductance capacitance electromechanical components V VI VII. discrete semiconductors. integrated circuits electronics technology Chapter III Section II assembly soldering technology techniques commonly used in Chapter III electronic debugging techniques Section I describes the instrument and the use of electronic devices commonly used in the introduction of electronic voltmeter II III IV oscilloscope signal generator Digital frequency meter V VI VII meter electronic measurement system of grounding and common ground Chapter electrician electrician training and basic skills test to identify and test a resistance using a multimeter test two common components of the discriminant Radio Experiment 3 Experiment 4 assembly and welding training volt-ampere characteristics of circuit elements mapping experiments five potential...
