Machine Learning: An Algorithmic Perspective, Second Edition (Mixed media product)

By Stephen Marsland

Taylor Francis Inc, United States, 2014. Mixed media product. Book Condition: New. 2nd Revised edition. 262 x 183 mm. Language: English . Brand New Book. A Proven, Hands-On Approach for Students without a Strong Statistical Foundation Since the best-selling first edition was published, there have been several prominent developments in the field of machine learning, including the increasing work on the statistical interpretations of machine learning algorithms. Unfortunately, computer science students without a strong statistical background often find it hard to get started in this area. Remedying this deficiency, Machine Learning: An Algorithmic Perspective, Second Edition helps students understand the algorithms of machine learning. It puts them on a path toward mastering the relevant mathematics and statistics as well as the necessary programming and experimentation. New to the Second Edition * Two new chapters on deep belief networks and Gaussian processes * Reorganization of the chapters to make a more natural flow of content * Revision of the support vector machine material, including a simple implementation for experiments * New material on random forests, the perceptron convergence theorem, accuracy methods, and conjugate gradient optimization for the multi-layer perceptron * Additional discussions of the Kalman and particle filters * Improved code,...
