Brand New Book ***** Print on Demand *****.Financial regulatory policies are of interest to Congress because firms, consumers, and governments fund many of their activities through banks and securities markets. Furthermore, financial instability can damage the broader economy. Financial regulation is intended to protect borrowers and investors that participate in financial markets and mitigate financial instability. This report provides an overview of the regulatory policies of the agencies that oversee banking and securities markets and explains which agencies are responsible for which institutions, activities, and markets. Banking U.S. banking regulation traditionally focuses on prudence. Banks business decisions are regulated for safety and soundness and adequate capital. In addition, banks are given access to a lender of last resort, and some bank creditors are provided guarantees (deposit insurance). Regulating the risks that banks take is believed to help smooth the credit cycle. The credit cycle refers to periodic booms and busts in lending. Prudential safety and soundness regulation and capital requirements date back to the 1860s when bank credit formed the money supply. The Federal Reserve as lender of last resort was created following the Panic of 1907. Deposit insurance was established in the 1930s to reduce the incentive of depositors to withdraw funds from banks during a financial panic. Securities, Derivatives, and Similar Contract Markets Federal securities regulation has traditionally focused on disclosure and conflicts of interest, rather than on prudence. Securities regulation is typically designed to ensure that market participants have access to enough information to make informed decisions, rather than to limit the riskiness of the business models of publicly traded firms. Firms that sell securities to the public must register with the Securities and Exchange Commission (SEC). SEC registration in no way...
